Excipient q.s.	100 g

Use in species

Dogs

Cats

INDICATIONS FOR USE AND TARGET SPECIES

canvital * is recommended as an adjuvant in the treatment of allergic dermatitis: alopecia, eczema, and skin pruritus. For use in dogs and cats.

DOSAGE:

Less than 10 kg: 5 g (1 teaspoon).

10–20 kg: 10 g (2 teaspoons).

More than 20 kg: 15 g (3 teaspoons).

The initial dose should be repeated every 24 hours and maintained for two weeks or according to clinical response; afterwards, the dose should be gradually reduced at weekly intervals and discontinued once clinical remission is safely achieved, depending on the case and at the veterinarian's discretion.

ROUTE OF ADMINISTRATION: Oral, mixed with food.

STORAGE CONDITIONS:

Store the product in a cool, dry place protected from light. Keep out of reach of children and domestic animals.

WARNINGS:

Administration of corticosteroids with NSAIDs increases the risk of gastrointestinal damage. Prolonged use without proper supervision may cause endocrine disorders such as Cushing's disease. For use exclusively in dogs and cats. Veterinary use only. Consult a Veterinarian. Sale requires a medical prescription.

For exclusive use by the Veterinarian.
