

# ANDOFLOX® 0.2 %

REGISTRATION: Q-0209-090

## Oral solution

Broad-spectrum antibacterial

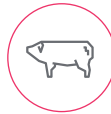

### FORMULA

Each mL contains:

Enrofloxacin	2 mg
Vehicle q.s.	1 ml

### Use in species:

Pigs

### INDICATIONS FOR USE:

Andoflox® 0.2% Oral solution is a broad-spectrum antimicrobial with rapid bactericidal action, effective against diseases caused by Gram-positive, Gram-negative bacteria, and mycoplasmas in swine. Indicated for diseases of: Digestive system: *Salmonella spp.*, *E. coli*, and *Campylobacter spp.* Septicemic infections by: *E. coli*, *erysipelas*, and *Staphylococcus spp.* Respiratory system: *Bordetella spp.*, *Pasteurella spp.*, *Actinobacillus spp.*, and *mycoplasmosis*.

### DOSAGE:

3 mL/5 kg body weight (equivalent to 1.2 mg), every 24 hours. For 3 days; if infection persists, extend for 2 more days at the veterinarian's discretion.

### ROUTE OF ADMINISTRATION: ORAL

### WITHDRAWAL PERIOD:

Discontinue medication 5 days before slaughter of animals intended for human consumption. Do not consume edible products until 5 days after the last treatment.

### WARNINGS:

Do not administer to animals sensitive to the ingredients of the formula. Enrofloxacin is a CNS stimulant and should be used with caution in patients with seizure disorders. Does not require combination with other antibiotics. Sale requires a medical prescription. Veterinary use only. Consult a Veterinarian.

### STORAGE CONDITIONS:

Store in a dry place at no more than 30 °C, protected from sunlight. Keep out of reach of children

**For exclusive use by the Veterinarian**
