

VERRUGEL

Q-0209-051

Topical gel

Astringent, keratolytic, and topical keratoplastic

Formula

Each 100 g contains:

Salicylic acid	8 g
Glacial acetic acid	12 g
Vehicle, q.s.	100 mL

Use in

Cattle (producers of milk and meat)

Sheeps

Goats

Pigs

Equines

INDICATIONS AND USE

Topical astringent with keratolytic and keratoplastic action indicated for removal of warts, corns and necrotic tissue in cattle (producers of milk and meat), equines, pigs, sheep and goats.

CLINICAL PHARMACOLOGY

Due to its astringent, keratolytic and keratoplastic activity, it causes destruction of the superficial layer of the skin or removal of necrotic tissue and at the same time cauterizes and disinfects the application area.

DOSAGE

Apply a generous amount of VERRUGEL® to the affected area. Repeat the application daily until the repair of the affected tissue, according to the case and at the discretion of the Veterinary Doctor.

ROUTE OF ADMINISTRATION: TOPICAL

WITHDRAWAL TIME

Does not apply

WARNINGS

Store at room temperature not more than 25 °C, in a dry place and protected from sunlight.

Do not leave within the reach of children and pets.

Keep the container closed.

It is a caustic product.

Irritating product, use gloves for its application.

Avoid contact with mucous membranes and open wounds.

Do not administer in animals with sensitive skin or in immunosuppressive status.
